

Ciclo de Seminarios 2021 - 2022

<u>Nombre doctorando</u>	<u>Título seminario</u>
M^a Pilar Alfaro Ibáñez	Synergies in morphology and genetics of <i>Microtus</i> s.l. (Rodentia, mammalia): phylogenetic and biostratigraphic implications
Juan Luis Bernal Wormull	Working with speleothems from the North of Navarra, Spain
Julia de Entrambasaguas Laguna	Evolution of benthic foraminifera faunas and associated climatic events during the Paleocene
Álvaro García Penas	Barremian-Aptian shallow marine carbonates of the Oliete subbasin (Teruel, Spain)
Gracia Puzo, Francho	AMS from rock fragments in the southern Pyrenees
Jon Jiménez Beltrán	What can we learn from hydrothermal systems for the assessment of the long-term geochemical processes expected in the geological storage of CO ₂ ?
Martín Linares Montes	Interpretation and 3D modelization of Cenozoic tracksite in Aragon. New possibilities for the geotourism
Eduardo Medrano Aguado	Percepción de las excavaciones por los niños de Oliete
Irene Peñalver Clavel	Warm Paleocene and Eocene events in Zealand: correlation and paleoenvironmental interpretation based on geochemistry and benthic foraminifera
María Samper Marco	The rise of the light
Pablo Sierra Campos	Unravelling the kinetics of burial remagnetizations; an integrated 4D approach (paleomagnetism, geothermometry and geochronology)
Ana Simón Muzas	Characterization of volcanic, volcanoclastic and intrusive rocks evolution of the Pyrenean Carboniferous-Permian basins preferential directions of lava flows?
Diego Torromé Sanz	Sedimentation of the Maestrazgo basin at the end of the Cretaceous
Cristian Vera Soriano	Analysis of artificial recharge systems of underground aquifers for the optimization of water resources in Chile
Ixeia Vicaller Gayán	Actual glaciers shrinkage in the Pyrenees
